

## **SAFETY ALERT!**

It had come to the attention of one of our Cross Creek residents that 2 Street Light Service Box covers were unsecured and could become a safety hazard. They are about 10 inch round and are light green color (see photo attached). The situation was reported by the resident to TECO and was fixed the same day it was reported.

Your HOA Board of Directors are recommending that in the future if you should come across any Street Lights that are out or Service Box covers that are not secured down please contact TECO at **1-877-588-1010** or use their website

(<http://tampaelectric.com/residential/reportaconcern>) to report the outage or safety issue. If you are reporting a street light outage please provide them with the number on the light pole and the address of the nearest home. Be sure to specify that you are reporting a service box cover issue, when it applies.
